Rob,

I assume you are telling Alpine to cover the power panels as they are power washing. They seem to have done that on previously floors.

Also, to keep you in the loop, NJ Dept of Health was called by the neighbors on Bergen. We should do what we can to keep dust, paint, glass etc contained to our site. Thanks.

Gary and Jim,

In building B Alpine are working in an area close to a power panel distribution box that is currently opened. I would need it to be protected so that they do not spray it with water. On that same panel I turned off the circuit for the exterior window fans, this was requested by the inspector from the New Jersey Dept. of Health. He was concerned about the dust being exhausted to the neighbors houses on Bergen St.

Michael

Force Demolition and Alpine contractors did a really good job of closing damaged/open windows of Bldg's A, B, and C.
